

## Crossing at Laredo:

If you are planning to cross at Laredo you are on your own. The procedures here are similar to those indicated at the Columbia crossing. See below for road log and map of Laredo taken from a Sanborn's Travelog for the location of the Aduana and Migracion building located between Bridge Number I and Bridge Number II on the Mexico side of the border. It also gives directions to Highway #1 which goes to Bustamante.

## Travel Log (based on Sanborn's)

The Laredo-Nuevo Laredo border crossing has two bridges designated Bridge I (old) and Bridge II (new). This log takes you from our Sanborn's office through Laredo's downtown to Bridge I, which tourists going to interior Mexico must use. Allow at least 30 minutes for customs clearing. We suggest you get as much of your paperwork done the day before you plan to travel as possible.
